

Searching for a Specific User and Updating the User Information.

DESCRIPTION

Project objective:

Create a Spring MVC web application that will retrieve users based on their user ID. The retrieved user data will then be edited in a form and updated in the database. The entire database processing has to be done using Hibernate. Front pages will be made in JSP.

STEP 1: Create a jsp page to take in a user ID

STEP 2: Create a controller that will validate the user ID.

STEP 3: The controller will update the details in the database.

STEP 4: Standard methodology of creating controllers, services,dao,and entity classes.

STEP 5: Document the step by step process involved in completing this task.
