<p> Get started with <mark>Bootstrap</mark>, the world's most popular
framework for building responsive, mobile-first sites, with Bootstrap <abbr title="Content Delivery
Network">CDN</abbr> and a template starter page. </p>
```

```
<p>According to the official website, Bootstrap is the most popular HTML, CSS, and
JS framework for developing responsive, mobile first projects on the web. Sounds great! Now how
do I use it? It would be easy to send you over to their Getting Started page and call it a day. Their
setup guide is indeed a host of useful information — links to CDNs, explanations on how to install
with Bower, npm, and Composer, information on integration with Autoprefixer and LESS, a bunch of
templates, licenses, and translations — but you could read this blog here instead for a better and
easier understanding.</p>
```

```
<span class="glyphicon glyphicon-pencil"></span>

    <p class="text-left">Lets take a look at the components of bootstrap:</p>

    <h1>CSS<span class="badge badge-secondary">Quoted</span></h1>

    <p class="text-justify">Copy-paste the stylesheet link into your head before all other
    stylesheets to load our CSS.</p>

    <h2>JS <span class="badge badge-secondary">Quoted</span></h2>

    <p class="text-justify">Many of our components require the use of JavaScript to
    function. Specifically, they require jQuery, Popper.js, and our own JavaScript plugins. Place the
    following scripts near the end of your pages, right before the closing bodytag, to enable them.
    jQuery must come first, then Popper.js, and then our JavaScript plugins. We use jQuery's slim build,
    but the full version is also supported.</p>
