Write Up

Build a responsive website for a restaurant where users can read the details of the restaurant. The website should provide the users a brief overview of the restaurant and its bestsellers, its address, as well as an option to contact the restaurant. During sprint planning, you agree to lead this project and develop the website.

Tasks to be completed :

● Building the website using HTML

● Adding Bootstrap to the website

● Adding a landing page, a navbar, a CTA button, a grid, and a footer

● Adding a contact form for users to contact the restaurant

● Pushing the code to the git repository

The following tools are used :

● HTML: To define the content of the website

● Bootstrap: To build the website

● JavaScript: To handle events and responses

● JQuery: To include JavaScript plugins like modals, tooltips, etc.

The following requirements should be met:

● The website should be responsive.

● The website should have a carousel, a navbar, a CTA button, a grid, and a footer.

● The website should have a contact form.

● The source code should be pushed to your GitHub repositories. You need to document the steps and write the algorithms in the Google Docs.

● The link of your GitHub repository is must. In order to track your task, you need to share the link of the repository. You can add a section in the Google Docs.

● Document the step-by-step process involved in completing this task.
